4 Executive summary

Identity matched cleanly on CIN and GSTIN. The entity is **active** with current filing indicators and an EPFO/ESIC employee headcount of roughly **120, rising over three years**, consistent with an operating business of growing scale. However, a **pending commercial suit** and a **consumer dispute** were matched, and a common director links the entity to two other companies, one of which carries its own litigation. No insolvency, debarment or regulatory references were matched within scope. Overall risk is assessed **Moderate**: the litigation and director linkages warrant legal review before a high-value commitment.
