## INAMDAR BUSINESS ANALYSIS

This sample demonstrates the structure, tone and source-backed format of a public-records business risk report. It is illustrative only and does not refer to a real engagement.

## Sample entity

|                                                                      |                                                            |
|----------------------------------------------------------------------|------------------------------------------------------------|
| Entity reviewed: Aranya Precision Components Private Limited         | Purpose: Vendor onboarding and credit exposure review      |
| Search date: 22 June 2026                                            | Coverage: India public records and credible public sources |
| Identifiers supplied: CIN, GSTIN, registered address, promoter names | Report type: Standard Report sample                        |

## Executive risk summary

The sample entity shows a moderate public-records review profile. The company identity appears internally consistent across supplied identifiers, but two compliance indicators and one civil litigation reference would require commercial follow-up before onboarding.

| Area           | Finding                                                                                    | Risk signal |
|----------------|--------------------------------------------------------------------------------------------|-------------|
| Identity match | Company name, registered address and supplied CIN align in the sample dataset.             | Low         |
| Compliance     | GST filing pattern shows two delayed periods in the illustrative review window.            | Moderate    |
| Litigation     | One district court civil matter appears name-linked and requires party-match confirmation. | Moderate    |
| Regulatory     | No sample SEBI, debarment or insolvency match identified.                                  | Low         |

## Scope checked

|                                       |                                        |
|---------------------------------------|----------------------------------------|
| MCA / ROC company records             | GST public registration indicators     |
| EPFO / ESIC establishment indicators  | District court and High Court searches |
| Consumer court and ITAT references    | IBC / insolvency public records        |
| SEBI / regulatory orders              | Government debarment lists             |
| Director and promoter linked entities | Adverse public records review          |

## Illustrative litigation table

| Forum          | Record located                                               | Match basis     | Review note                                              |
|----------------|--------------------------------------------------------------|-----------------|----------------------------------------------------------|
| District Court | Civil recovery matter listed against a similar entity name.  | Name + city     | Confirm party identity before treating as entity-linked. |
| High Court     | No exact sample match located.                               | Exact name      | No adverse signal in sample search.                      |
| Consumer Court | One complaint category keyword match reviewed and ruled out. | Keyword         | Not treated as a red flag.                               |
| ITAT / Tax     | No sample order linked to supplied identifiers.              | PAN unavailable | Search limited by identifier availability.               |

## Compliance and regulatory indicators

The sample review flags delayed GST filing periods as a commercial follow-up point. No illustrative insolvency, debarment, Watchout Investors or SEBI order match is treated as confirmed in this sample.

|                                                          |                                                       |
|----------------------------------------------------------|-------------------------------------------------------|
| GST indicator: Delayed return pattern in sample period   | MCA indicator: Active status in sample company master |
| IBC indicator: No exact sample match                     | Debarment indicator: No exact sample match            |
| Director-linked entities: Two linked entities for review | Regulatory orders: No exact sample match              |
